The non-sentenced ADP is currently at its highest level in the Jail Profile Survey's history at 49,863. In the 2nd Quarter of 1998 when we experienced the highest ADP to date (80,391 inmates), the non-sentenced total was only 45,575. Despite several historical reversals in the overall ADP trend, the non-sentenced population has increased in an almost perfect linear fashion since we have been tracking this variable.
